

Climate Change - Seminar

Winter Semester 2024/2025

When: Tuesday, 8:00-10:00 CET, starting 22nd October 2024
Location : Room 3.12 (Prieserstraße)

Course objectives

The seminar focuses on health effects of climate change and needs to transform and act to ensure planetary health. Students will reflect on the multifaceted consequences of global environmental changes, analyse the current state in a defined area and define transformation needs in different sectors and on all levels, whose implementation is necessary for a healthy life within the planetary boundaries.
